JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Vol. 329 Nos. 1 and 2 15 JULY 1992

CONTENTS

Editorial vii

Roger Parsons xi

Determination of the surface potentials of solvents
L.I. Krishtalik, N.M. Alpatova and E.V. Ovsyannikova (Moscow, Russia) 1

Surface potentials of water, methanol and water + methanol mixtures
C.G. Barraclough, P.T. McTigue and Y.L. Ng (Melbourne, Australia) 9

A "macroscopic" approach to the adsorption potential shift at the air–solution interface
Z. Koczorowski, S. Kurowski (Warsaw, Poland) and S. Trasatti (Milan, Italy) 25

A three-dimensional lattice model of TIP4P water molecules and of polar monomeric and dimeric solute molecules against a charged wall
R. Guidelli and G. Aloisi (Firenze, Italy) 39

A thermodynamic interpretation of the heterogeneity effects on phase transitions at electrified interphases
P. Nikitas (Thessaloniki, Greece) 59

On the thermodynamic properties of several two-dimensional Ising lattices
U. Retter (Berlin, Germany) 81

On the influence of molecular structure on the orientation and the occurrence of phase transitions in organic adsorbed layers at the mercury–water interface
C. Buess-Herman, C. Franck and L. Gierst (Bruxelles, Belgium) 91

Double-layer dynamics in the adsorption of tetrabutyl ammonium ions at the mercury–water interface. I: Survey
T. Wandlowski and R. De Levie (Washington DC, USA) 103

Differential and thermodynamic electrode capacity—impedance control of identity
B.M. Grafov and B.B. Damaskin (Moscow, Russia) 129

An analysis of adsorption and kinetic effects in cesium salt solutions on the mercury–water interface within the framework of new electrostatic models
B.B. Damaskin and V.A. Safonov (Moscow, Russia) 139

A model for the coadsorption of ions
A.R. Newmark (New York, NY, USA) and W. Schmickler (Logan, UT, USA) 159

Evidence for adsorption of alkali ions at the mercury–electrolyte interface from their mixed aqueous chloride solutions at 1 M ionic strength
A. Baars, M. Sluyters-Rehbach and J.H. Sluyters (Utrecht, Netherlands) 171

Temperature dependence of cadmium adsorption on oxides. Part 2. Thermodynamics and microcalorimetry of the $Cd(NO_3)_2$ rutile system
L.G.J. Fokkink, A.G. Rhebergen, A. De Keizer and J. Lyklema (Wageningen, Netherlands) 187

Structure of interphases of low melting point salts and protonic hydrates with mercury and gold in relation to double-layer capacitance behaviour
B.E. Conway, J.B. Liu and S.Y. Qian (Ottawa, Canada) 201

Solvent effects in the electric double-layer structure for gallium and gallium-like metals
I.A. Bagotskaya and V.E. Kazarinov (Moscow, Russia) 225

Systematic trends in the crystal face specificity of interfacial parameters: the cases of Ag and Au
S. Trasatti (Milan, Italy) 237

Superficial structure of Au(110) at the electrochemical interface
A. Hamelin (Meudon, France) 247

Adsorption of pyridine at the Au(210)–solution interface
D.F. Yang, L. Stolberg, J. Lipkowski (Guelph, Canada) and D.E. Irish (Waterloo, Canada) . . 259

A study of *p*-toluenesulphonate anion adsorption at the gold (311) single crystal electrode
P. Skołuda and E. Dutkiewicz (Poznań, Poland) 279

Specific adsorption at Au(111) electrodes studied by second harmonic generation
B. Pettinger (Berlin, Germany), J. Lipkowski (Guelph, Canada), S. Mirwald (Berlin, Germany) and A. Friedrich (Eugene, OR, USA) 289

The use of optics for understanding the electrochemical interface
F. Chao, M. Costa and A. Tadjeddine (Meudon, France) 313

A pH-dependent surface-enhanced Raman spectroscopy investigation of the adsorption of 3-acetylpyridine
G. Pofahl, J. Barthelmes and W. Plieth (Berlin, Germany) 329

Surface energies of solid electrodes
K.E. Heusler and J. Pietrucha (Clausthal, Germany) 339
